My name is Dr. Ari Barzilai, I have recently joined the faculty of life sciences at Tel Aviv University, as a lecturer in biochemistry. I am a biochemist and neurobiologist and the main goals of my research are to study the molecular mechanism of "programmed cell death" and its relation to cell death caused by normal aging and neurodegenerative diseases. An abstract of proposed research plan is enclosed.

I will be most thankful if you could please sent me grant application forms as well as any other pertinent information. In addition could you please inform me whether your foundation supports research out side of the united state.

I am looking forward to hearing from you soon.

sincerely yours

Ari Barzilai
